TCS-3393-66

Copy 4

6 June 1966

MEMORANDUM FOR: Director of Special Projects, DD/E&T

ATTENTION : Chief, Security Staff

SUBJECT : Requested Press Releases

1. Attached is a letter received from [redacted] requested authority to make public via press releases information regarding a [redacted] which was developed and built for NPIC to handle the time data recorded on the edge of the KH¹ film.

50X1

2. Although there is probably no marker for another such device as we provide the intelligence community, as a service of common concern, with the interpreted data it does reflect a level of capability at [redacted] and is consequently of value to them.

50X1

3. We have reviewed this proposed press release and see nothing which is revealing from a security standpoint except the two portions bracketed in red which we would recommend be removed. If you concur we will reply and advise them that there is no objection provided these portions are deleted.
